## **BULLETIN 6** *Revised*

### **NEW AND REVISED DOCUMENTS**

*November 1998*

The CCDC strives to ensure that the standard forms and guides it publishes reflect norms and practices currently employed within the Canadian construction industry. It also seeks to maintain a philosophy and approach which serves and protects the interests of not only the contracting parties but also all those involved in the construction contracting process. In order to achieve these goals, periodic reviews of standard documents are essential, as well as timely and necessary revisions where changing industry practices, court decisions or other pertinent developments so dictate. The Committee recognizes, however, that a standard form cannot be the subject of constant and frequent revision. The publication of a revised version of an existing CCDC form cannot be the subject of constant and frequent revision. The publication of a revised version of an existing CCDC form or a new document to replace an older edition is therefore an important and serious step as it renders previous editions obsolete.
